

Dear Valued Lube USA Customer,

LHL-140-4 (PN: 249127), LHL-140-4S (PN: 249125), & LHL-140-7 (PN: 249126) are being discontinued as of March 1, 2017. Lube USA will continue to sell remaining stock after March 1 until all stock is consumed. Once LHL-140 is no longer available, Lube Corporation, Lube USA's parent company, recommends using LHL X-100 or LHL-300 in its place based on the performance factors of each grease that best meets your machine's lubrication needs. Technical Data, SDS, and pricing of each grease is available upon request.

We apologize if this product change will inconvenience your company. Lube USA team members lobbied heavily to keep this grease in production. Because LHL-140 and LHL-300 are near duplicate products, Lube Corp. has decided to only keep LHL-300 available for the market. All Lube USA team members will be available to address any concerns you may have. Our goal is to help you make this transition as seamless as possible. Please do not hesitate to contact us.
